LOS ANGELES, Feb. 3.—The world changes, when you come through the Cajon Pass, gateway to Southern California, from the high desert east of the mountains.

On the desert, with room for a thousand cities, you see a dozen men, watching their alfalfa, long trains rolling by eastward and westward.

Tom climb 1400 feet to the top of the Pass, which is 4000 feet high, passing the wonderful Verde ranch, with innumerable arroyos with spouting millions of gallons of water, 2000 feet above sea level.

Through the Pass, the road leads by San Bernardino, where Mexicans from Australia settled long years ago, and were visited by Mormons from Salt Lake City, coming in their slow ox carts.

On ancient graveyards monuments you may read that So-and-so, faithful Mormon, lies buried, slain by a mighty beast.

The Cajon Pass was frequently by big grizzly bears in these old days. The mighty beasts worried and killed many. Now they are gone and real estate developments replace them.

A little lower down and you are among the orange groves and people with a worry different from the grizzly bear worry.

The Luckeys, husband and wife, of whom you buy oranges, lemons, grape fruit, avocado at the roadside, never saw a grizzly.

They do see great chain stores going direct to the groves, buying oranges, selling at retail, cutting prices, cutting off the little middleman.

One well-managed chain store does more damage to little people than 10,000 grizzlies.

Three hours after leaving the desert, its expanse, lynx, jack rabbit and lizards, you lead in this city, on its way to world population. And all the news of the world abounds at you on the street corners.

Today, some one attempted to murder Ortiz Rubio, Mexico's new President.

He had just concluded his inauguration ceremonies, escorted by the United States, wearing the progress as "a progressive, moderate power through development of natural resources."

It is fortunate for Mexico that the would-be assassin's five shots went wild.

Wall Street sends cheerful news. Somebody bought four million shares and more, and more than a 1,000,000 shares every yesterday. Prices went higher, the little fish are biting again.

A local editor in the East, kind enough to print this column in his independent newspaper asks:

"Why do you write so much about California?"

The answer is: "Because I am in California." "Because I see so much local jealousy in America."

Opposition was voiced by Henry C. Wallace, chairman of the Public Works Commission, and Justice Benjamin V. Glavin, secretary of the Maine Governor's committee.

The New England railroad committee was appointed by the governors of the six states to consider.

Continued on Page 12, Column 1

There are about 5,000,000 people in California now, many of them spending money accumulated by hard work. They all buy goods. Every state in the Union has "FREE TRADE WITH CALIFORNIA" and California has free trade with every other state.

What would European nations give for such a condition?

We should appreciate our blessings and thank Heaven when we hear good news from any part of America.

WEATHER

Fair tonight; Friday partly cloudy, probably with snow; slowly rising temperature; moderate shifting winds, becoming easterly.
Sun rise 6:55; set 5:04.
Light all visible at 5:54 p. m.

NEW ENGLAND LINES SPURN RAIL RIDGER
Executives Say Consolidation Would Prove to Their Own Disadvantage
New England's leading railroad executives today turned down the Interstate Commerce Commission's recently announced plan of railroad consolidations.

Without a speaker dissenting, the executives, at a State House public hearing, said that a series of seven in the New England Railroad Committee, declared there would be no advantage, but undoubtedly great disadvantages in a consolidation.

New England railroads, they asserted, are progressing satisfactorily under the present arrangement.

Physical handicaps, the New England railroads were never in better physical condition than they are now, said the executives.

Many of the largest railroad heads and executives were present at the hearing in Gardner Auditorium, devoted to presentation of the views of New England railroad managers.

Among those present were John Polley, president of the New Haven Railroad; Arthur P. Bussell, vice-president of the New Haven Railroad; and Thomas Perkins, president of the Boston & Maine; H. M. Russell, vice-president of the Boston & Maine; and Maurice McDonald, president of the Maine Central.

Other executives present were: R. Todd, president of the Bangor & Aroostook; Henry Hart, general manager of the Bangor & Aroostook; George L. Crocker, chairman of the Maine Central; and Edward L. Southwick, secretary of the New England Governors' committee.

Henry C. Wallace, chairman of the Public Works Commission, and Justice Benjamin V. Glavin, secretary of the Maine Governor's committee.

The New England railroad committee was appointed by the governors of the six states to consider.

Cop Asks His Way to Capitol

A demand that Boston residents be given preference in appointments to the Boston police force was made at a hearing today before the legislative committee on cities by Representative Lewis B. Sullivan, Jr., of Boston.

Sullivan said he found a patrolman, newly appointed to the force, wandering around Tremont at 10 o'clock, looking for a job.

He declared the Civil Service rules were changed at the time of the Boston police strike to allow persons from all over the State to be appointed.

Fighting an Inferno in Ice

Firemen of 400 men battled flames which destroyed the greater part of the three-story brick Jenkins block in Washington St., with loss estimated by Fire Chief Leon A. Peterson at not less than \$150,000.

Mrs. Mildred Newhall, a telephone operator, was the heroine of the fire. Alone in the telephone exchange, situated in and of the burning structure, she stayed at her post, although nearly overcome by smoke until the day shift arrived.

Five girls of the day shift gathered with their coats on as the fire broke out. They were in the telephone exchange, situated in and of the burning structure, she stayed at her post, although nearly overcome by smoke until the day shift arrived.

After the fire had raged for nearly five hours and the flames were thought to be under control, they shot out through the roof and spread the flames and caused the fire to break out in the telephone exchange, situated in and of the burning structure, she stayed at her post, although nearly overcome by smoke until the day shift arrived.

After the fire had raged for nearly five hours and the flames were thought to be under control, they shot out through the roof and spread the flames and caused the fire to break out in the telephone exchange, situated in and of the burning structure, she stayed at her post, although nearly overcome by smoke until the day shift arrived.

FIREMEN OF 400 MEN BATTLE FLAMES

Whitman, Feb. 6.—For six hours today firemen of Brockton, Abington, Rockland and Whitman, battled with ice and working in relays because of the intense cold, sheeted flames which destroyed the greater part of the three-story brick Jenkins block in Washington St., with loss estimated by Fire Chief Leon A. Peterson at not less than \$150,000.

Mrs. Mildred Newhall, a telephone operator, was the heroine of the fire. Alone in the telephone exchange, situated in and of the burning structure, she stayed at her post, although nearly overcome by smoke until the day shift arrived.

PRICE STILL TOO WEAK TO TELL STORY

Most of the men have accused counsel and the latter in each instance today said that he was convinced of the innocence of his client. Counsel for Rodek said he was convinced that his client was telling a straight story and knew nothing of the kidnapping. One of the attorneys with three of the men as his clients said that he did not be-

A car needs a home. Have you a garage for rent? Tell about it and give location in the Want Ment Ads. That's the way to fill it.

GOLDEN HORSESHOE GLITTERS AS CHICAGO STARS SING 'LA TOSCA'

The golden horseshoe at the Boston Opera House was brilliant in the extreme as the society of the city turned out in full force for the third night of the Chicago Civic Opera Company's stay here. Claudia Muzio, in the title role; Marcoux, as Barone Scarpia, and

Cortis, as Mario Cavaradossi, won merited applause. The middle box is not identified for the reason that the owners were not the occupants at the time the photo was taken. (Staff photos.)

ASK PROBE OF 'RED' SCHOOL

Worcester, Feb. 6 (INS)—An attempt to probe the "A. R. C. of Communism" being taught in a summer school here, conducted at Holmes Park, early in July, were launched here today by leaders of several civic and welfare organizations.

Announcement read the school has already enrolled 50 young men and women from all parts of New England and that instructors will be sent from Communist headquarters in New York, has aroused a storm of protest.

Today it was stated that the matter will be brought to the attention of federal and state officials with a request that the activities of the school be made the subject of a thorough investigation.

Designated as the "Young Communist League Training School of New England," its leaders plan a five weeks' course. John W. Johnson, business manager, and school and president of the Y. M. C. A. Cooperative Society of Gardner, asserts that the curriculum includes training in public speaking and "the organization of labor."

The first of these summer schools was held last year. The school and the park are controlled by the Gardner organization, but all students, except those from the New York Communist headquarters.

All the students profess to be members of the Young Communist League of America and are selected through the league's various branches. Similar schools have been opened in Rhode Island and Connecticut.

Besides a thorough grounding in the tenets of communism, there are also courses in journalism, political science, evolution and sociology. The school boasts that its object is "for the instruction of the future leadership of the Communist movement in America."

"Labor aristocrats," was the term used by Johnson in referring to both the members of the restricted trade union and the highly-salaried labor union officials.

Among the textbooks used at the school are "The Kapital," by Karl Marx; social writings of Upton Sinclair; "The A. R. C. of Communism," translated from the Russian, and the "Labor Year."

Ladder Left to Aid Xmas Tree Light Thieves Stolen

Deerfield, Ill., Feb. 6 (INS)—Animated by the Christmas spirit, G. F. Baker & Son, local plumbing firm, erected a Christmas tree here last night, and hung 45 colored lights on it.

Someone stole 13 of the bulbs. Mr. Baker became testy.

A notice appeared on the tree: "This tree had 60 lights. You have stolen 13. The lights are now a little higher up so we have placed a stepladder here for your convenience in stealing the balance."

The tree remained up, because the street was rather poorly lighted. Today a new notice hung on its skeleton: "You fellows looking for the lights higher will have to wait a while. Somebody stole the ladder."

SEEKS USE OF NAVY AIRDROME

Friedrichshafen, Feb. 6 (INS)—Dr. Hugo Eckener, commander of the globe girdling Graf Zeppelin, today said he was writing to United States navy authorities for permission to use the Lakehurst naval airdrome on his contemplated trip to Rio de Janeiro this spring.

He said he was pointing out to the U. S. navy department that his trip was in the interests of the development of aviation and was ready to give all data procured in his South American journey to the U. S. Navy for its information.

According to unofficial reports from Washington received here recently, the United States naval authorities have decided not to entertain Eckener's request. They are

convinced that the Graf Zeppelin is a mere commercial venture from Europe.

A rare news item. Have you a rare item? Tell about it and give the name of the item. That's the way to win it.

CHICAGO CHIEF HITS DRY LAW

Chicago, Feb. 7 (AP)—Police Commissioner William Russell does not regard Chicago's present crime situation as bad "when it is considered today before the House judiciary committee that crime had increased enormously in recent years and that federal court congestion had been a result."

The commissioner commented in connection with the seven gang slayings and two gang attacks within the last week.

He blamed lawlessness in Chicago, "as in the nation, on prohibition, explaining that bootleggers and racketeers, having no recourse in the established law, settle their differences with guns and bombs."

"I haven't heard of any recent persons being killed," he said. "As for bombings, there have been two convictions and 14 arrests under State's Atty. Scanlon, and that more than there were for 20 years previous to his incumbency."

"We can't stop bombings because the victims refuse to cooperate with us. Most of these people have just as the hoodlums and gangsters who in about four, they got 'it,' but they won't tell."

Business men today were taking no action in the effort to halt the latest crime outbreak. The American Employers' Association announced it had employed a law firm in an attempt to bring to justice the men who shot down Philip A. Meagher, a superintendent of construction, yesterday while he was directing work in the new wing in hospital.

The shooting, done on land owned by the University of Chicago, was attributed to labor troubles.

Samuel Madonia, who operated a fruit store in a West Side building that was bombed early this week, has been booked on charges of murder and arson. The body of Vito Russo was found in the wreckage of the building.

Vacation Dinner Given Educator
Headmaster Leslie L. Cleveland of the Cambridge high and Latin school, who is leaving tomorrow for Europe on this first vacation in 20 years, was given a testimonial dinner by his colleagues at the Hotel Commodore, Cambridge.

Miss Mary Healy presided at the dinner, which was attended by 120 members of the faculty and other school officials, including Supt. Michael E. Fitzgerald. Also present were James Dugan and Principal John W. Wood of the Rindge Technical school. Headmaster Cleveland was presented a purse of gold.

Pound for a Juryless Trial of Petty Cases

Washington, Feb. 6.—Trying that United States commissioner given power to try petty offenses, the House Judiciary Committee today before the House judiciary committee that crime had increased enormously in recent years and that federal court congestion had been a result.

"I haven't heard of any recent persons being killed," he said. "As for bombings, there have been two convictions and 14 arrests under State's Atty. Scanlon, and that more than there were for 20 years previous to his incumbency."

POLA NEGRI'S GEMS SEIZED

Boston, Feb. 6 (AP)—After several years absence from the city where she first achieved fame, Pola Negri, the American film star, today was arrested by police on charges of possession of stolen goods.

The Rev. Mr. Vossler was married to Miss Catherine Rogers of Ellipton, Ohio, by a Catholic priest, but the Rev. Mr. Vossler said the agreement had been received previously.

The Rev. Mr. Vossler said the agreement had been received previously.

Traders Punished

Moscow, Feb. 6 (AP)—Charged by the Government with having violated the regulations respecting the payment of taxes, 1110 private traders in the Moscow district were fined a total of 263,000 rubles (about \$120,000) today.

Women's Apparel—Men's Suits and Overcoats—Draperies

WET-DRY DUE FUTILE, HUGHES CONTENDED

Washington, Feb. 6 (INS).—The possibility of the United States Supreme Court reversing its attitude toward prohibition while Charles Evans Hughes acts as chief justice was closely disputed today, by a study of the briefs he filed, upholding the constitutionality of the 18th amendment in the famous "national prohibition case".

Hughes joined with the attorneys general of a score of dry states in 1920 in filing a combined attack on prohibition, launched by dry states. The next chief justice intervened in two of the dry cases as a "friend of the court," opposing Rhode Island's outright attack on the Volstead act. In both cases as in five others decided at the same time, the Supreme Court followed the reasoning laid down in Hughes' briefs.

In his Kentucky case, Mr. Hughes declared such a contrary representation, not being a friend of the Federal Constitution would be only a plea for the "expression of a popular cause without any binding effect on Congress or prohibition."

The submission to popular vote as far as ratification of Federal amendments is concerned, can be nothing more than the "expression of a popular cause without any binding effect on Congress or prohibition."

TAFT "RESTING COMFORTABLY"

Continued From First Page

His physicians devoted seven words of the 26th bulletin they sent President Hoover at noon, announcing the fact that Mr. Taft was not eating properly.

The bulletin, signed by Dr. Francis T. Mercey and Thomas A. Clayton, and dated 11:55 A. M., read:

"There is no material change in Chief Justice Taft's condition. There is no fever and his color is satisfactory. Greatest difficulty is to administer sufficient nourishment."

RENEWED BY REST

The physicians said that Mr. Taft appeared in his sleep as he was yesterday and that his general condition seemed unchanged.

They added that he had had a good night's rest and was feeling comfortably today.

That the former chief justice was in no immediate danger was indicated in announcement that his sons, Charles P. and Robert A. Taft, were still in Cincinnati, and would not arrive in Washington until the weekend.

The Senate today adopted a resolution expressing regret over the "serious illness" of Mr. Taft and the hope that he soon would be restored to health.

SENATE RESOLUTION

The resolution, offered by Senator Harris (Dem.) of Georgia, read: "Resolved, That it was with deep regret that the members of the Senate learned of the serious illness of the former Chief Justice Taft and it is hoped that he will soon be restored to health."

The first visitor at the Taft household today was J. Austin Latimer, secretary to the governor of South Carolina, who came to present the respects of the chief executive of the Southern commonwealth. His visit was presented.

Many messages of sympathy from friends of the former President and various parts of the world arrived at the house.

Ordinarily quiet, Wyoming, where it passes the Taft home was pretty much abuzz today. A policeman stood by to direct traffic to the house and photographers wandered up and down the sidewalk, and their combined presence caused passersby to stop appreciably and form small groups.

"That Tired Feeling Is Gone—I Eat and Sleep Well"

"And It Is a Pleasure For Me to Testify How Good Bon-Tone Really Is"

Mr. William Troop
Mr. William Troop of 25 Rockville Park, Roxbury, Mass., who is a member of the Pilgrim Fraternal Organization of Roxbury, stated: "For the past two years I had been feeling pretty miserable. I don't know whether it was from overwork or not, but I attribute to that. I was always tired out, with no life or ambition to do anything. Also, my nerves were quite unstrung, and I slept poorly—I was always restless, and would awaken as tired as when I went to bed. My

Offer \$20,000 Reward for Koutiepooff Clue

Paris, Feb. 6 (INS).—Supporters of Gen. Alexander Koutiepooff, White Russian leader, mysteriously missing for nearly two weeks, today offered rewards totaling \$20,000 for news of his whereabouts. They support he has been kidnaped by Soviet agents.

An anonymous letter received today by police said his body could be found in Stenon Woods, west of Paris. The words have been carefully searched.

Gen. Koutiepooff on Sunday, January 26, went for a walk to the Russian officers' club, near his home, and did not return. His monarchist friends charge he was kidnaped and murdered by Communist agents, while the Communist charge he had absconded with a sum of money.

Excitement over his disappearance continues unabated. The newspapers are filled with telegrams on the matter, and police authorities have assigned 150 men to investigate the disappearance.

Of 100 clues submitted to them out of the more plausible have been run down without results.

Dean Howes to Retire
Wilmington, Feb. 6 (AP).—Dean George Edwin Howes of Williams College announced today he has asked the college administration not to reappoint him, but plans to continue to occupy the Garfield professorship of ancient languages.

Wills \$15,000 Estate to Divorced Wife

Newport, R. I., Feb. 6 (AP).—The will of Lord Col. Robert W. Kerr, U. S. A., who died recently in New York, filed for probate here yesterday, that he had left all of his \$15,000 estate, with the exception of \$10,000, to his divorced wife, Mrs. Frances Johnson Kerr of Newport.

The will was left to his widow, Mrs. Frances Kerr of Washington. The divorced wife was named as one executrix.

Special Insurance Taxes Shown Unfair

Washington, Feb. 6 (AP).—The contention that 25 out of every 26 dollars collected in special state insurance taxes during 1929 were used for general revenue purposes for which the policy holder already had been taxed as a citizen, was cited today in a statement by the Chairman of Commerce of the United States.

A study made by the insurance department showed that nearly 90 per cent of the \$100,000,000 collected from special insurances in 1929

Doctors Silent About Mrs. Hall

New York, Feb. 6 (INS).—The condition of Mrs. Frances Rogers Hall, principal defendant in the famous Hall-Mills murder case, was reported as satisfactory today by officials of Marine Hospital here, where she is a patient.

Hospital authorities refused to discuss the nature of Mrs. Hall's ailment.

Mrs. Jane Gibson, on whose testimony the case against Mrs. Hall was based, today was in a Jersey City hospital, suffering from a severe attack of influenza.

STARS SHINE IN "TOSCA" ROLES

By MOSES SMITH

The most huge audience crowd of the Boston Opera House yet was seen yesterday afternoon and evening to hear the Chicago Opera Company. First a "Tosca" (Puccini) and later in "Pavane" (Debussy). Both of these works are standard favorites in the repertoire of most opera companies.

The first procedure for school children and their guardians on a Saturday, a strictly extended session of "Tosca" play accompanied by a concert, a variety of musicals, and a performance of the latest musicals of the last century.

Both of these works were superbly acted last night.

More than 10,000 people were seen on and in the most well-known opera house in the world. The audience was so large that it was necessary to have the opera house filled with the most famous artists.

Her entire out of song, however, is intimately bound up with her singing. The audience was so large that it was necessary to have the opera house filled with the most famous artists.

What we have said of the opera house can be repeated in the case of the Vanni-Marcus.

It is true that his singing voice is not as strong as that of the other two, but he is a concentrated power that grips the listening audience.

It is a case of an extraordinary intelligence, mature, well-developed, assuming a commanding presence. As a sample of what such an intelligence can do to change conventional presentation of opera, we set down the observation that only one during the entire time Vanni-Marcus was on the stage were we conscious of his looking toward the conductor for the best.

The third member of the trio, Antonio Costa as Cavaradossi, has a beautiful voice, which, in his singing to force. He has also some skill in the art of impersonation.

But he was, of course, quite out of his class when making with the other two.

Roberto Maroncelli, the conductor, worked up more excitement than we can recall at any of his past appearances in past years. Consequently we heard not a routine "Tosca," but a rendering of the score that realized its drama and its grandeur.

Instead of offering a review of the matinee "Tosca," which was in most respects the satisfactory presentation of preceding seasons, we present a story. It tells of a little girl who saw Paul in the opera with her fond parent.

The way she is given a summary of the story. The relationship between Paul and Marguerite is faithfully referred to as marriage. The children must be brought to face life's realities gradually and suddenly.

In the Opera House the child is intent, obviously more interested in pictures and actions than in music, though the latter is not quite lost on her, for tomorrow she will speak of it. She asks whether Paul and Marguerite were married.

The implied question is very much in order, for the adult listener notes no discernible change in quality of Hackett's voice.

Later the child asks why Marguerite wants to marry Paul instead of Robert. The fond parent answers that she is in love with him.

Where, she asks as Paul sits and rambles unceremoniously in the garden after Marguerite has gone indoors—"Where is Paul going?"

Well, what would you say, fond parent given up and begins to talk about such irrelevant matters as the child's restlessness.

That question, which always does the child like best, and the answer unceremoniously in "Marguerite" (Edith Mason). This play serves at least 100 per cent.

On the way home the child tells at last five times the story of a simple, rather unoriginal conventional version, but we think it fits.

Antique a Day

No. 16

This is a Tainton Chest, so-called because its type originated in Tainton, Mass., in the early 1700s. It is painted pine, and is in its original condition, except of course, for the seats of time and use.

The piece is owned by Mrs. Cecil E. Pines of Cambridge, whose husband is a member of the faculty of the Harvard School of Business Administration.

The chest, shown in yesterday's paper, is similar in appearance to a chest of drawers, but is a different piece of furniture.

It originated in Paris, of course, and was introduced into London by the Duchess of Bedford in 1780. In due course it became fashionable in the Colonies. It was used to cover and protect more elaborate, turned, full and round dress.

It came into and out of use with fluctuating styles, which changed every year or so in those days. It is now in fairly good use in 1929. Many of these chests were elaborate in themselves, and were made in fine, silk and satin, and lavishly trimmed with lace and ribbons.

In connection with the Massachusetts Tercentenary Year, the Boston Evening American will publish from day to day interesting specimens of authentic antiques.

Readers possessing genuine antiques, particularly early American origin or of historic association, are invited to forward photographs and records for publication. In case an photograph is available, the American will send one of its staff cameramen to photograph your antique, if you live in Greater Boston. Material should be addressed to "Antique Editor," 5 Winchester Street, Boston.

All the armed guards of the Vatican, the Swiss Guard, the Papal Guard, the Pontifical Gendarmery, together with the firmen, put on full dress uniforms before "first call" sound, summoning them to duty.

The Swiss Guard, who are just outside the famous Vatican entrance, are the only soldiers in the world who are not allowed to wear a uniform.

The clerical staff of the secretary of state's office was kept busy during the night of the 25th, by virtue of the later edition of the Vatican, on February 11, 1929, a free and independent monarch in his own domain, and many of the messages received on the 25th.

Next Wednesday, February 12, this will be a solemn and high mass in the Vatican chapel, marking the eighth anniversary of his formal coronation. That ceremony will be attended by the diplomatic corps, the Roman aristocracy, distinguished visitors and pilgrims.

New York, Feb. 6 (AP)—The first disturbance in the garment strike in connection with the strike of 28,000 members of the International Ladies Garment Workers Union occurred today when strikers and so-called left wing workers, who are not on the picket line, met in 30th and 31st Sts.

The left wing workers were on the picket line, but they were not allowed to enter the shops at which they are employed when they ran into a parade of the strikers. Immediately riots and clubs were flying, police estimating that 100 men and women were fighting. Three arrests were made, one strikebreaker and two left wing workers.

About 300 strikers and left wing workers were involved in the disturbance on 30th St. and Ninth Ave., which was broken up by police without incident.

One Dead, 2 Hurt in Crash at Littleton

Littleton, Feb. 6 (AP)—Ernest Berlin, 35, of 143 Oxford St., Littleton, Me., was killed and Charles and Bernard Martell, both of 28 York St., Auburn, Me., were injured today in an automobile accident here. The Martells were taken to the Ayer hospital.

Kerlin and the Martells were occupants of a truck loaded with chickens, driven by Charles, which rolled over an automobile operated by Charles Stevens, of Everett. The collision occurred at the junction of the Fitchburg and Groton roads.

How a Girl Helped Her Affianced in His Business

Read This First
Dulley Parker's efforts to help people usually resulted in trouble, as Gordon Smith, her fiancé, tried his best to keep her from imitating Forbes, a financier who had offered him unfair terms in an important business deal, to her sons for a week-end so that she could fix everything, but Dulley had her way, and not only invited Forbes, his wife and his daughter, Angela, but also a new acquaintance, Schuyler Van Dyke, and a scenario writer, Vincent Leach, whom she planned to marry off to Angela. To make matters worse, she acquired an ex-convict as a butler. From the moment Forbes entered the house he was irritated by everything, particularly Dulley's gaudy and ruin started Gordon in the face.

New Read On
From MARION DAVIS' forthcoming AB-Talking picture by Vanda Terebik and Edwin J. Meyer, based on the play, "Dulley," by M. C. Connelly and George Kaufman.

CHAPTER 4

DULLEY had no idea how long she had been sitting there crying. She had done everything she could to help Gordon put over his business deal, and now he had run away from her. Suddenly a pair of arms was flung around her from behind. "Gordon!" She wheeled about with a happy cry and buried her head on his shoulder. "You've come back!"

"Don't you know, dear," he told her, huskily, "that if it weren't for you I couldn't work as I do. You're really helping me all the time just by being you. That's all you have to do to help me—just be yourself."

"Oh Gordon, darling, I know I've done some silly things, but when I marry you I'll promise to stand by you and love you and help you. That's why I'm doing it now."

Gordon realized, suddenly, that if he didn't work hard now he never would. And he would be just a series of middle-class, the right people in the wrong places and the wrong people always with Dulley.

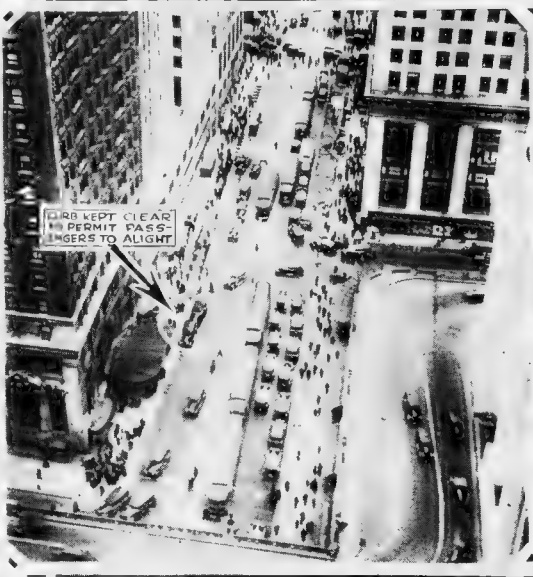

"Don't you see, darling, that everything depends on my getting along with Forbes?" he asked her. "If I'm not in on this merger of his, I'll be wiped out. And I'm afraid I won't like being down here with such a funny crowd."

The argument must just as well never have been started, for the impression it made on Dulley. But Forbes is being unfair, she insisted. "I'd never see it if you just went to him in the morning and said, 'Offering you a sixteen and two-thirds per cent. advance, even if it means a divorce, I'll do it.'"

Forbes appeared just then, his manner more gruff than usual, his eyes staring at Dulley. "You've been talking to the chairman of the board," he said. "Mr. and Mrs. Forbes and Angela into the room. Mr. and Mrs. Forbes."

ROXBURY BOARD OF TRADE PROTESTS HIGH RISES

Pictures Tell More Clearly Than Words Right and Wrong Traffic Methods

Benefits of the no parking rule are indicated by the smooth way in which traffic flows along 124 St., New York. The middle of the street (view of which looking west from Park ave.) is kept clear for moving automobiles and the sides of the thoroughfare in condition to permit passengers to alight on the sidewalks.

Parking along the curbs of Summer st., Boston, congests that artery in such a degree that movement of motor cars is ever difficult and sometimes impossible. Passengers, too, are inconvenienced by being obliged to alight in the middle of the street. This bird's-eye view shows in vivid manner how much worse Boston conditions are than they are in New York.

BUSINESS IS DRIVEN OUT OF DISTRICT

Rich Property Owners Held Charged With Driving Business Out of the District

Business is being driven out of the district, it is charged, by the actions of a few rich property owners who are holding out for high prices for their land. The district, which is one of the most business-like in the city, is being driven out of business by the actions of a few rich property owners who are holding out for high prices for their land. The district, which is one of the most business-like in the city, is being driven out of business by the actions of a few rich property owners who are holding out for high prices for their land.

Bass Says He Will K. O. Fuller at Garden Tomorrow

FOOT PROXERS READY FOR BATTLE

ROCKY HOCKEY BILL TONGUE IN A RARE AREA

BENNY BASS of Philadelphia, junior lightweight champion of the world, and Sammy Fuller, pride of the North End, are ready for their 10-round war at the Garden tomorrow night.

The champion is an ex-manager, Jim McManis, and a manager, Mike Moran, and a snapper was at the fight. He has a record of 10 wins and 10 losses, and he is a professional.

Bass is fresh from a victory over a world champion, and he is a professional. He is a professional, and he is a professional.

Bass is fresh from a victory over a world champion, and he is a professional. He is a professional, and he is a professional.

MIAMI BEACH, Fla., Feb. 6.—If find there is a strong feeling among men well posted in the boxing game that Sammy Fuller is likely to defeat Benny Bass, who is a junior lightweight champion, when they clash in a 10-round bout at the Boston Garden on Friday night, said Mr. Boston today.

It would not be surprising if Fuller looked Bass chopped from his position as champion of the world, but it is a fact that Fuller is a professional, and he is a professional.

Fuller is a professional, and he is a professional. He is a professional, and he is a professional.

Fuller is a professional, and he is a professional. He is a professional, and he is a professional.

Fuller is a professional, and he is a professional. He is a professional, and he is a professional.

Fuller is a professional, and he is a professional. He is a professional, and he is a professional.

BOSTON UNIVERSITY and the University Club will meet in the feature game of a team hockey bill at the Arena tonight. Boston Hockey Club and the newly formed Melrose Greyhounds, will clash in the supporting contest.

The B.U. Greyhounds will start at 8:15 and these teams will alternate periods with the participants in the other contest.

Each team will have a 20-minute period, but in the case of a draw, it will be possible to play overtime. A lot of fast, hard hockey should result from these two contests as each team has a lineup of many well known stars who are bound to provide action once they get warmed up.

It is expected that the University Club will meet for the second time this winter and if those two teams play a good game as they did in the first meeting in which they won 4-0, the Greyhounds will be a good team to watch.

IRREGULARITY PREVAILS ON 'BIG BOARD'

By STANLEY W. FRENDEL
New York Feb. 6 (AP)—Electricity flowing from power plants in the Empire State today was being sold at a price sharply below mid-day when peaking pressure was renewed against some of the high priced industrial users.

Heavy buying of Fox Film and a selected group of utilities turned the company's power up to 10¢ per kilowatt-hour early in the afternoon. The bid failed to maintain the bulk power set in the first 4,000-kw. short segment of the next 10,000-kw. block.

Call money renewed at 1/2 per cent, and the rate in the 10 to 15-day official opening rate was shown at 1 1/2 per cent. The 10 to 15-day money and commercial paper rates

Wall Street was divided in opinion as to whether the New York Federal Reserve bank would force the issue by cutting the discount rate. The odds were in favor of the rate being left alone.

Professing to be a student of the market, I was not in a position to qualify that a lowering of the rate might be more effective for some time, but that the market would have to prevent the rate from falling too far.

There was little in the day's trading to suggest that the Government. Several excellent 1929 earnings reports made their appearance, Crucible Steel and McKesson & Co. were among the many issues to make favorable comparisons with 1928 steel production is reported to have shrunk 40 per cent, and the bulk of the increase has been off set.

more extent by the lower prices. In the early months of the selling season, the average price per bushel of Minnesota's corn was \$1.43. A record of selling prices for the 1934-35 season shows a decline of nearly 1 point in the price for the year at 75¢. Auburn, Iowa, dropped 3¢, and Columbia, Mo., 2¢.

ION RICE REHEWED

The rice bottom, to 1 & 1/2¢, apparently was predicated on the theory that since full production was not expected, the market would avoid the premium asked for by certain creditors as a result of the rice shortage. The market was marked up more than 1 point to a new high for the year at 29¢, but it closed with a 1¢ drop, when the rice crop was reported to be 10,000,000 bushels.

Detroit Edison Co. & Wabash Ry. Co. have agreed to sell 100,000 shares of their common stock at \$1.15 a share, plus a 10¢ dividend. The total was \$12,500,000.

the shreds of an antique railroad, Reading moved up nearly 4 points to 12.4 and a 2 1/2% gain in the last session. It easily led the 2 points into a gap of 2 points and American Wool was common and preferred. Canadian Pacific, Columbia Carbon, Callimet & Arizona, General Asphalt, General American Tank Car and General Lead sold 2 to 6 points higher.

Selling order per, limited to final low, when the time came for the market to close. The first 500 shares Fox Film A. and other steel had went off. Gillette Safety Razor was hammered energetically by the market. The market was in a new low for the year. All Cheney Corp, Radio Corp and Radio Keith went among issues to limit the factors. The dropped 10 points. Total sales amounted to 3,500,000 shares.

**Airline Companies
in New Merger Plan**

New York, Feb. 6.—Acquisition of Aeronautical Industries, Inc. by National Aviation Corp. is planned, Letters will be sent to Aeronautical Industries stockholders offering them the right to exchange their common stock for shares of the four new Aeronautical Industries for three of National Aviation.

The Founders Group, which owns an interest in both companies, will be represented on the board of National Aviation. The new company will have 100 shares of both companies are listed on New York Curb. National Aviation is being valued at about \$500 and Aeronautical Industries at about \$2.

Heckling the Mayor?

Something Inconsistent in Attitude of Civil Service Commission

WHY does the Civil Service Commission reject four appointments made by Mayor Curley?

The Mayor doesn't know. Nor do the appointees. Nor, for that matter, do the people of Boston whom these men were named to serve.

All four seem ably fitted to assume the work laid out for them by the Mayor and Mr. Curley will doubtless force the issue of their confirmation. He should. When men are well suited to the positions for which they have been named it is the function of the Civil Service Commission to deprive the public of their services.

In this particular instance, the Commission may be suspected of wishing to embarrass Mayor Curley's administration. Surely, it is not consistent. One recalls that the Civil Service body quickly confirmed Mayor Nichols' appointees to the post of traffic commissioner. Yet he was a man without previous experience in that line and with considerably less experience in public service than former Congressman Joseph A. Conry. Mr. Curley's selected choice.

There is apparent no excuse, nor explanation of this inconsistency.

Two in the Hospital

A Little Lesson for Those Who THINK Themselves Unhappy

NO more affecting story has appeared in print in months than the record of what happened at Franklin and Devonshire Streets to John Lenetti and Anthony DiBenedetto.

With other men, these two were standing on the Devonshire Street side of a building in process of construction when the top of the beam of a derrick snapped at the clevis hook and fell to the ground.

Lenetti—48, married, of 79 Lubec Street, East Boston—was seriously injured that he was removed to the Haymarket Relief Station.

They were NOT treated on the new building; why were they there?

With many others, we read, they had gone to the place seeking work. FORTY men found employment. These had been turned away.

We KNOW a man who feels blue because he will be unable to turn in the old car this year and bring out a new one. There is a woman of our acquaintance who has not been quite herself since October, when she was demoted from her position in the household staff by the dismissal of a "second" girl.

With the picture of John Lenetti and Anthony DiBenedetto before us—leaving their wives and little children of a Winter morning to go looking for work, and landing in the hospital—we shall worry no longer about those who THINK themselves unhappy.

But—IF a question is permissible—what ever became of all the great public improvements which were going to put an army of men to work in this neighborhood?

Still in the air.

Better bring one or two of them down to earth.

Mansfield's Campaign

Left a Debt of \$12,000 Which Should Not Be Regarded as Personal

ROBERT HENNESSY, Richard J. Lane, Henry S. McPherson, Francis J. Murray and George H. Nutter sign an appeal to other members of the Bar to join them in wiping out the debt of \$12,000 which has retarded the recent mayoralty campaign of Frederick W. Mansfield.

This is an unusual petition, just as the president of the Bar association was an unusual candidate.

There are seasoned political warriors who, after a losing campaign, would not give up the fight. Second thought, THOSE bills, for printing, advertising and mailing, to Mr. Mansfield are "a source of constant anxiety."

He polled nearly 100,000 votes. In some respects his campaign may have been ill-advised, but on the whole it was a man and energetic. He was a man who was the former treasurer of the Commonwealth. Those for whom he was so spirited a fight should be prompt to ease him of the consequent burden. They MAY have need of him another time.

New York Day by Day

By O. O. MCINTYRE

New York, Feb. 6—Every high priced car in New York has its quota of eccentric patrons who do not dine according to custom. Some are persons of prominence, others are unknown and still others are those touched by some freakish fancy.

In a Park Avenue cafe on Thursday evening of each week a gentleman in full evening dress sits at a table for two alone. For many years it has been his custom to dine there on that special evening with his wife. She died tragically in a fire disaster and he has never since shown her his face.

The dinner of a famous portrait painter never varies. He is at the same table nightly in one of the best known restaurants and the waiter brings him a tea pot of hot water, a plain lettuce salad and three graham crackers. His tip is always a silver dollar. He happens to own the building which houses the restaurant.

Perhaps the most consistent host to a hotel dining room is the guest of an expensive luncheon. He is there for the past five years and has been dining at the same restaurant for the past five years. The restaurant patronage is said to total about \$500,000 a year.

At a high priced cafe on 57th at day, orders have been placed for the waiter and gravely handed the cashier 25 cents. The waiter has no patience with modern prices and his son arranged for

him to eat there, paying the huge difference on the 7.

But the most unusual dinner of all is a dinner which at intervals like to have soup on one place, fish at another, and so on through salad, dessert and so on.

It is a beautiful little building, financed by a mutual plaster on the community chest.

We were wearing a tuxedo with the wrinkle radiating from the forehead. Mr. Ford and his associates, but we cannot understand why the theater was named. The Purcell and the entry of a few parasites into the blood of a man may fill him in a very few days with pulsating millions of invisible enemies—though to interfere seriously with his vital processes, perhaps enough to destroy him.

There is another important aspect of the curious methods of multiplication that are found among these tiny creatures, another reason why they can increase so rapidly.

We have noted that the individuals are very small and that they do not survive for long. But let us consider again the way in which they enter in the body into living life—into two halves, or into a greater number of fragments. Every one of these his grows into a complete new individual. In the process there are no copiers; every bit of protoplasm is a new individual.

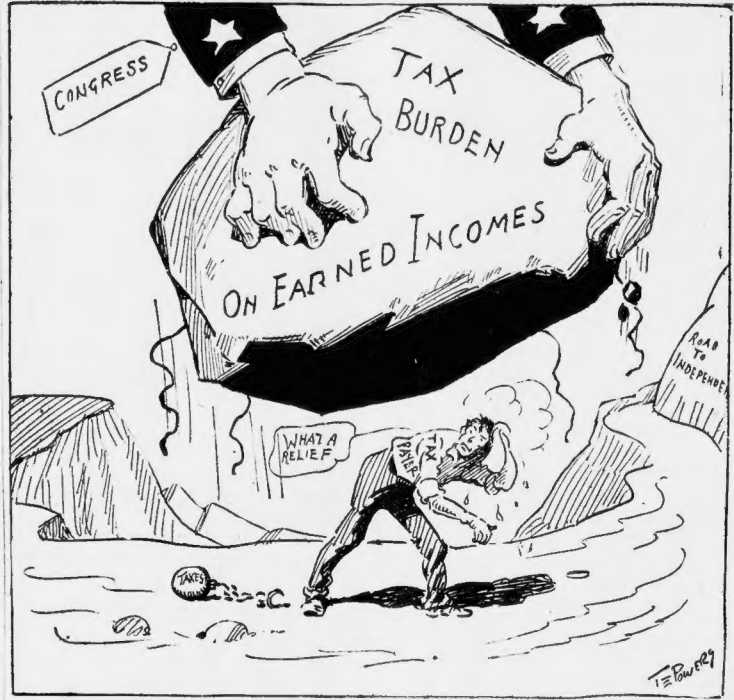

They do not rest, but they grow. It is potentially immortal; although the individual exists only for an hour or so their tissue lives forever.

They do not rest, but they grow. It is potentially immortal; although the individual exists only for an hour or so their tissue lives forever.

They do not rest, but they grow. It is potentially immortal; although the individual exists only for an hour or so their tissue lives forever.

A Heavy Load to Carry—Lift It!

By T. E. Powers

The BAER Facts

By ARTHUR "BUGS" BAER.

WE are indebted to Edsel Ford and the Detroit Times for a big night in the Michigan woods last Wednesday.

It was the suburban premiere of Edsel's Community Theater at Grosse Pointe. The evening was complete when Graham McNamee drove up in a swallow-tail uniform that had refused to surrender at Richmond.

We were wearing a tuxedo with the wrinkle radiating from the forehead. Mr. Ford and his associates, but we cannot understand why the theater was named. The Purcell and the entry of a few parasites into the blood of a man may fill him in a very few days with pulsating millions of invisible enemies—though to interfere seriously with his vital processes, perhaps enough to destroy him.

H. G. Wells Writes on "The Science of Life"

In Collaboration With Prof. Julian Huxley and Geo. P. Wells

(Continued from Yesterday)

NEVERTHELESS, the calculation shows the almost explosive expansion of a protozoan population under favorable conditions. And in this fact lies the explanation of the power of these microscopic creatures.

The countless swarms of micro-organisms in the sea are eaten by minute crustaceans, and these in their turn are eaten by fish. In the sea are eaten by minute crustaceans, and these in their turn are eaten by fish.

These protozoa are divided into four classes. There are first the Rhizopoda which include amoebae; their name means "root-footed," and they move in their power of constantly changing their shape by protruding and withdrawing blunt lobes or fine branching threads of living substance.

When these creatures multiply by division of their bodies their offspring abandon the parental shell and make new ones of their own. All the Radiolarians and many of the Foraminifera live floating in the waters of the sea.

There is, consequently, a potential sea of abandoned shells drifting on the ocean floor. The creature is here and there, and they can multiply in numbers and they can multiply in numbers.

In the deep sea, where the physical conditions are such that abandoned living shells are rare, the shells of a radiolarian remain and form a deposit called "radiolarian ooze."

In the course of past ages the shells of radiolarians have been buried under the earth and rocks, and as during the process of geological change has advanced and receded over most of its surface, they have been left as geological strata on dry land.

Women in Science

By ARCHIBALD HENDERSON

IT is a common saying that no woman ever attained eminence in science. It was believed, or at least asserted, that women's brains were not capacious enough for great and intense thought, and that she was not intended by a benevolent Creator to rival man in the higher realms of thinking.

This was only another phase of the familiar saying, now the butt of ridicule on the part of advanced men and women, "Woman's place is in the home."

Today women are at last coming into their own, and demonstrating their mental powers in many lines of endeavor.

Emil Ludwig has recently been writing about the twelve greatest women who ever lived; and one of the twelve is probably one of the greatest scientists who have ever lived: Madame Curie.

Twice within a few years her admirers in the United States have presented her with a grant of \$100,000, to enable her to carry on researches which have been of immense value to science.

Not a few women have achieved eminence in mathematics and astronomy.

Among them may be mentioned Maria Mitchell, Margaret Murray Huggins, and Mary Whitton, who conducted numerous scientific experiments, and translated Newton's great work, "Principia," into French.

Not a few women have achieved eminence in mathematics and astronomy.

More Courts, More Judges

Also More Federal Prisons and More Prosecutors—Why?

Q—I SEE there is considerable unemployment in the United States.

A—Yes, but that won't last long. Didn't you read the report of the President's prohibition enforcement committee?

Q—I did, but what do you mean?

A—I mean that the government is soon going to be taking care of everybody.

Q—How?

A—A large part of the population will be in jail and the rest of us will be employed by the government chasing them into jail and guarding them while they're there.

Q—Yes I know. We are to have MORE prohibition police officers and a larger coast guard and a big, new border patrol. Then they hope to arrest MORE people.

A—Of course. That will require MORE courts, MORE judges, MORE prosecutors—all of them recommended in the commission's report, endorsed by the President.

Q—And you think the new jobs will solve the unemployment problem?

A—Largely.

Q—And I suppose there will have to be more prisons?

A—Oh, yes. The President's fifth recommendation is "expansion of federal prisons."

Q—How many persons do they arrest now for taking or giving a drink?

A—Eighty thousand last year were arrested and several hundred murdered.

Q—Could the federal courts handle eighty thousand cases a year?

A—No. In spite of "bargain days," when those who pleaded guilty were let off with light fines, there were TWENTY THOUSAND CASES AWAITING TRIAL ON NEW YEAR'S DAY.

Q—Heavens, were those twenty thousand people in jail?

A—No. They were out on bail, running or patronizing speakasies.

Q—Are there many speakasies?

A—Thirty thousand in New York City alone, Police Commissioner Whelan says.

Q—Does that mean that a large section of our people are lawless?

A—Well, it means that a large section of our people are defying what they consider an unjust, undemocratic and un-American law.

Q—Is that good AMERICAN doctrine?

A—The President's commission says it is.

Q—What?

A—Sure. The commission opens its report on prohibition by saying that prohibition clashes with AN OLD AMERICAN CONCEPTION OF THE CITIZEN'S RIGHTS.

Q—What are the commission's words?

A—"It is impossible wholly to set aside observance of the prohibition act from the large question of the views and habits of the American people with respect to private judgment as to statutes and regulations affecting their conduct."

Q—Anything else?

A—The President's commission says:

"We must bear in mind the Puritan's objection to administration of natural rights, classical in origin, the democratic tradition of individual participation in sovereignty, the clash of organized interests and opinions in a diversified community, and the divergences of attitude in different sections of the country and as between different groups in the same locality."

Q—But does the commission say or imply that there is no harm in nullifying such a law by widespread disobedience of it?

A—What else does this mean? "We must not forget the many historical examples of large-scale public disregard of laws in our past."

Q—What laws have we nullified by "large-scale public disregard" of them?

A—Well, for example, the Sunday blue laws and the federal laws supposed to give the vote to the negro in the South.

Q—Well, in face of what the commission says, will Congress go right ahead building up the prohibition enforcement machine?

A—Yes, bills are being rushed to put all the commission's and the President's recommendations into effect.

Q—Can't the people do anything about it?

A—Yes, finally the people will take the hint from the President's enforcement commission.

Q—And?

A—And follow the example of their ancestors to rid themselves of oppression and of the oppressors.

What Do You Know?

BOSTON'S ORIGINAL KNOWLEDGE TEST

Do you know:
1. Who wrote, "Hark! Hark! The Lark at Heaven's Gate Sings?"

THE RHYMING OPTIMIST

BY ALINE MICHAELS
HERE is a picture which my mind recalls
Always complete and perfect as
I saw it first: the low adobe walls
The arched, cactus-spined
Shadows of gold on leaves of
The arched, cactus-spined
Shadows of gold on leaves of
The arched, cactus-spined
Shadows of gold on leaves of

And to dwell in the sun's embrace!

The midday haze of heat, relentless, crept
A tinge of gold across the desert
A tinge of gold across the desert
A tinge of gold across the desert

And to dwell in the sun's embrace!

WORDS OF THE WISE MEN

Attempt the end and never stand
It is old, thou shalt drink it with pleasure.
Nothing's an end but never stand
It is old, thou shalt drink it with pleasure.

For a new friend is as new wine; what
The new is not comparable to him!

Philosophy is nothing but discretion.
—Selden.
